# PROJECT TOPIC

**Title:** Generating Abstract of research papers(arxiv) using pre-trained transformers

**Description:** This project aims to develop a text summarization model using pre-trained transformers. The model will be able to generate concise summaries from the long text of the research document.

Through this project, I will attempt to fine-tune a pre-trained transformer model to generate an abstract of a research paper given its detailed text

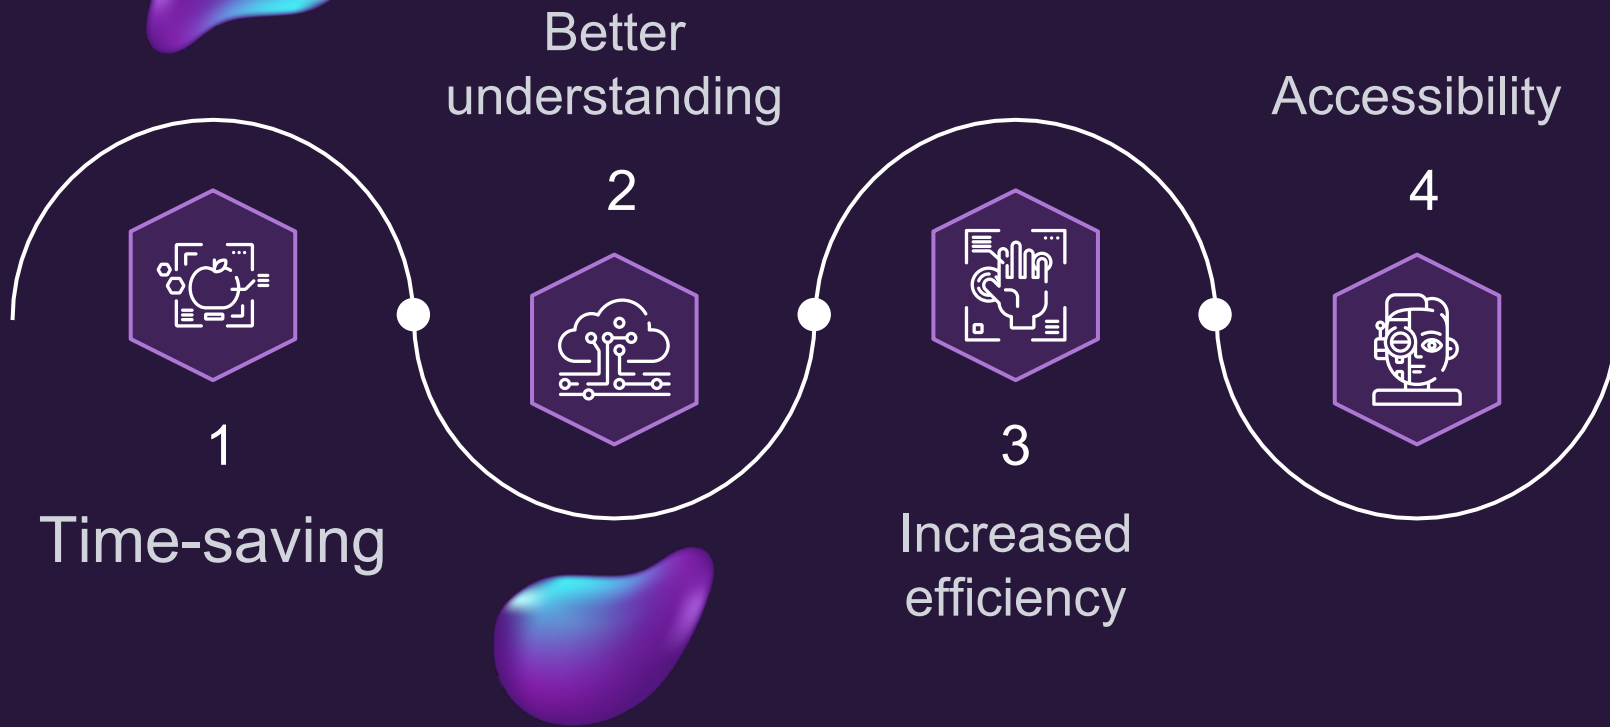

# STATEMENT OF PROJECT OBJECTIVE

- > Develop a text summarization model that can accurately summarize research documents.
- > Use pre-trained transformers to perform text summarization.
- > Fine-tune the pre-trained transformer models on scientific papers/arxiv datasets.
- > Report the performance of the tuned models.

Datasets	# docs	avg. doc. length (words)	avg. summary length (words)
CNN	92K	656	43
Daily Mail	219K	693	52
NY Times	655K	530	38
PubMed (this work)	133K	3016	203
arXiv (this work)	215K	4938	220

Table 1: Statistics of our arXiv and PubMed datasets compared with existing large-scale summarization corpora, CNN and Daily Mail (Nallapati et al., 2016) and NY Times (Paulus et al., 2017).

# Statements of Value \*

# Review of the state of the art and relevant works

Dataset of arxiv research documents is published through paper ×

# WHAT IS MY APPROACH?

## Datasets

Download the  
scientific  
papers/arxiv  
dataset

+

## Deploy

Select the  
pretrained  
transformer  
models of T5

## Evaluation

evaluation metrics  
such as ROUGE.

×

# Tools and Techniques

×

## Tools

Python, PyTorch,  
hugging face  
transformers

## Technique

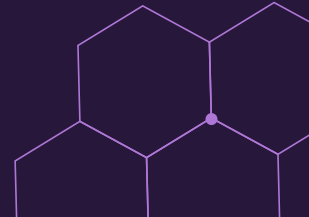

Natural language  
processing, deep  
learning, Transformers

×

×

# Deliverables

Fine-tuned transformers model  
Source code and documentation on how to use the model.  
Report on the performance of the model on the chosen scientific  
papers/arxiv dataset test set.

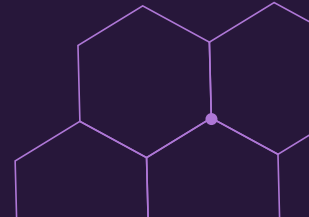

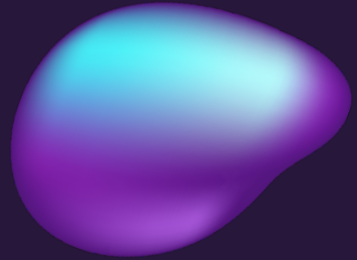

×

# Evaluation methodology

Use standard text summarization evaluation metrics such as ROUGE-1, ROUGE-2, and ROUGE-L. ×

Compare the performance of the proposed finetuned transformer model on a test set of scientific papers/arxiv.

×
